

Rock, Paper, Scissor Game

```
#include <iostream>

#include <cstdlib>

#include <ctime>

using namespace std;

int main()
{
    int player, comp;

    cout << "1. Rock\n";
    cout << "2. Paper\n";
    cout << "3. Scissors\n";

    cout << "Enter your choice: ";
    cin >> player;

    srand(time(0));
    comp = rand() % 3 + 1;

    cout << "Computer choice: " << comp << endl;

    if (player == comp)
    {
        cout << "It's a Tie!";
    }
    else if (player == 1 && comp == 3)
    {
        cout << "Rock beats Scissors - You Win!";
```

```
}  
else if (player == 2 && comp == 1)  
{  
    cout << "Paper beats Rock - You Win!";  
}  
else if (player == 3 && comp == 2)  
{  
    cout << "Scissors beats Paper - You Win!";  
}  
else  
{  
    cout << "Computer Wins!";  
}  
  
return 0;  
}
```
